

## **Wood from Oak tree to be repurposed for use throughout Hill Center Brentwood**

**BRENTWOOD, Tenn. – Jan. 30, 2016** – On Sunday, Jan. 31, crews working on the construction of [Hill Center Brentwood](#) – the mixed-use development that once fully developed, will consist of 600,000 square feet of office, retail and restaurant space in 10 buildings – will have the task of removing an Oak tree located on the property just off of Franklin Road.

While the removal of the tree is unavoidable in order to make required traffic improvements to the new entrance at Chadwick, the developers are pleased to be able to repurpose 100 percent of the wood from the tree for use within the development.

"The tree will yield 475-500 board feet of lumber that will be incorporated into various aspects of the development," said Jimmy Granbery, Chair and CEO, H.G. Hill Realty Company. "It will take about a month and a half for the lumber to be kiln dried and we are excited to discuss with our design team how to best utilize this valuable part of history at the site."

All told, the total planted area will cover approximately 2.83 acres of land. This includes a buffer area of 62,000 square feet of planted area, including 156 trees, shrubs, groundcover and sod. Phase 1.1 and 1.2 will include the planting of 96 trees and 61,600 square feet of planted area.
